Yard Ramps

Innovative Products
Fast Lead Times

Features

- All steel welded construction
- Capacities from 60,000 to 100,000 pounds
- Steel serrated grating
- Beveled approach provides a smooth transition
- Safety chains included to secure Yard Ramp to the dock or trailer
- Uses sturdy I-beam construction for strength and durability
- Widths available up to 144"

Common applications

- Military – particularly unloading equipment off flatbeds
- Unique situations requiring support for 60,000+ lbs.
- Situations where a heavy tractor-trailer needs to drive through a warehouse that is not at ground level
- Scrap yards – loading scrap material into containers that are shipped overseas for recycling
- Commercial real estate, rental companies that assist in the move in/out of large equipment to warehouses
