

# DOCK DAMAGE ENDS HERE!

Wheel Guides That Deliver— Only from Bluff

**BLUFF**  
MANUFACTURING

# Superior Docking Starts Here!

## WHY BLUFF WHEEL GUIDES?

Because **precision** matters at the dock—and so does **protection**!

Bluff's Heavy-Duty Wheel Guides ensure trucks line up perfectly every time—reducing the risk of damage, delays, and safety issues. Built from high-strength steel and finished in high-visibility safety yellow, they're easy to spot and tough enough for the busiest loading docks. Improve safety, protect your dock equipment, and speed up your operation—all with one smart addition.

### Built to Last

Heavy-duty 4.5" & 6" diameter steel construction handles repeated impact in high-traffic

### Stable & Secure

Dual mounting plates ensure long-term durability and rock-solid performance.

### Highly Visible

Bright safety yellow finish boosts driver visibility and reduces alignment errors.

### Flexible Fit

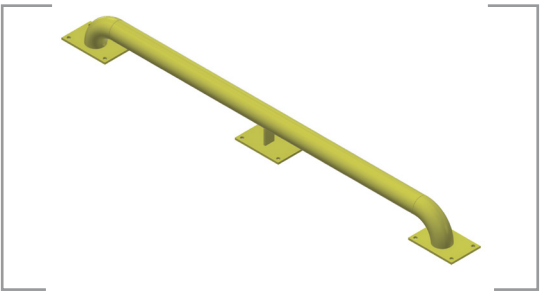

Available in 8', 10', and 12' lengths to suit any dock layout or operational need.

### Smart Design Options

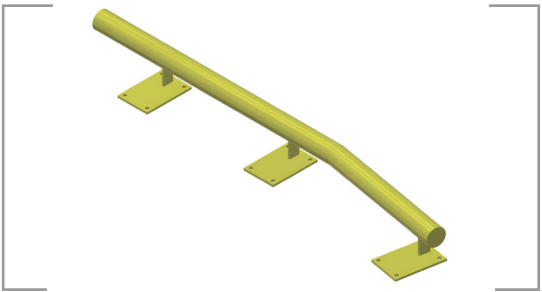

Straight or flare-style options for easier trailer alignment—even in tight spaces.

### Low-Profile + Warranty

Compact 9" height stays out of the way, and it's backed by a 1-year limited warranty.

**Standard Wheel Guide**  
Straight steel guide that aligns truck wheels for safe, accurate docking.

**Flared Wheel Guide**  
Angled-end guide that helps steer trucks into position, ideal for tight approaches.
