ENGINEERED FOR PERFORMANCE PRICED FOR VALUE.

The All-New Bluff Core Model Yard Ramp delivers the reliability customers expect from Bluff Manufacturing in a smart, economical design. Built in America and engineered around real customer feedback, the Core Model gives you rugged performance, essential features, and unmatched value—all backed by the name you can trust.

Whether you're expanding capacity, replacing outdated equipment, or adding flexibility to your loading operations, the Core Model is your go-to, cost-effective solution.

Built in America

Built with all-steel welded components for lasting durability and reliable performance.

Heavy-Duty Capacity

Supports 20,000 lb. of forklift and palletized loads for reliable daily operation.

Optimized Ramp Design

Features a 36' overall length with a 6' level-off for smooth transitions & safer trailer entry.

Expanded Working Width

The 84" deck width gives operators added room for confident maneuvering.

Rugged Undercarriage

Equipped with solid 18" rubber tires for easy positioning & long service life.

Built-In Safety Curbs

Includes 8" run-off curbs to help keep forklifts securely on the ramp.

High-Grip Surface

Serrated steel grating combined with diamond tread plate ensures consistent traction in all conditions.

Effortless Hydraulics

A double-acting hydraulic pump provides smooth, fast height adjustments with minimal effort.

Flexible Mobility Options

Choose between a tow bar or ramp clamp to match your preferred movement and workflow needs.

“The Core Model delivers **premium Bluff quality** at a **lower price**—proving that **strength** and **value** can go hand in hand.

- *Russell Smith*
